

## **Lithified Technologies Texas, LLC announces purchase of Texas license**

**Houston, Texas, March 25, 2021/** Lithified Technologies Texas (“LTTX”) ([www.lithtectx.com](http://www.lithtectx.com)) announced the purchase of the exclusive, perpetual license in Texas to market LithTec™, a proprietary high performance road base treatment product.

LTTX is pleased to announce that it has secured the exclusive, perpetual license in Texas to market LithTec™, a proprietary high performance road base treatment product. There are more than 680,000 miles of roads in Texas, more than twice the number of miles than the next closest state in the United States.

Bob Lawson, CEO of LTTX said, “After months of negotiation we have agreed to terms for the Texas license. It is a monumental day for LTTX and for our investors.”

The LTTX management stated, “We have created momentum in Texas and owning this license will enable us now to double our efforts toward installing roads. This is an exciting time for us.”

The management team of LTTX will release additional information during the coming weeks as they pursue opportunities in Texas.

### *About Lithified Technologies Texas*

*Lithified Technologies Texas acquired the exclusive, perpetual license to distribute LithTec™ in Texas. The company chose Texas as its starting point because of the significant number of paved miles of road in the state. Roads typically fail when the base layer erodes due to heavy truck traffic, water intrusion, and freeze thaw cycles. The LithTec™ proprietary product solves all three challenges at a reduced cost. Traditional road base “stabilizers” fail when attempting to glue the road base materials together. LithTec™ transforms the base into stone and binds the materials at the molecular level, creating a high performing structural member of the road design with more flexibility and ductility than asphalt. The improved performance of LithTec™ has been documented by independent third parties including Los Alamos National Laboratory, State Departments of Transportation, and independent engineers.*
